Personal Objectives

I like to study and discover how things work. Especially in the computer science and engineering domain.

In particular I am attracted by **low level stuff**. From *compilers* to *computing architectures* and *SoCs* to *PCB designs*.

Recently I am diving into **data center networks** and I am falling in love with it.

I also love **endurance sports** and want to dedicate as much of my free time as possible to it. I mainly like the opportunity to spend time with my *friends*, training and dreaming something big.

Education

Ongoing

Master Degree in Computer Science and Engineering, Politecnico di Milano

September 2024

Bachelor's Degree in Computer Science and Engineering (Computer Science track), Politecnico di Milano, 99/110

July 2021

Diploma di Maturità, Liceo Scientifico Alexis Carrel, 92/100

Skills

Operating Systems

Proud daily user of **Linux**. Good knowledge of Arch Linux and Debian based distros.

Programming Languages

Very good knowledge of C, Python and Java.

Good knowledge of Assembly (x86 and RISC V) and SQL.

Decent knowledge of VHDL, C++.

Others

Good knowledge of git.

System administrator of a small **Proxmox Server VE**.

Work Experience

5 years of experience helping high school students to make homework in scientific subjects both as *volunteer* and paid

2 years of experience as **Audio Technician** in various-sized events (from 100 to 4000 people) as *volunteer*

2 years of experience as **Basic Video Streaming Technician** at events as *volunteer*

1 year of experience as **Basic Light Technician** at events as *volunteer*

1 year of experience as **Basic Cameraman** at events as *volunteer*

1 semester as **Software Engineer** in the PoliSpace association at PoliMi.

Languages

Italian: Native language.

English: TOEIC 940/990. C1 in listening and B2 in reading.

Hobbies

I love watching YouTube videos of people building wooden furniture and repairing vintage electronics. This may seem like a *random* fact, but I love to discover how many everyday objects work. And how to build them with my own hand too!

I enjoy long runs, hard workouts at the track and endless bike rides with my friends.
